## PROFESSIONAL SUMMARY

Analytical and results-oriented Data & Management Analyst with 3 years of experience transforming operational and business requirements into actionable insights, automated reporting solutions, and process improvements. Skilled in SQL, Python, Tableau, Power BI, Excel, and statistical techniques to optimize workflows, forecast trends, and support executive decision-making. Adept at collaborating with cross-functional teams in Agile environments to design experiments, develop dashboards, analyze KPIs, and communicate findings in clear, data-driven narratives that influence strategy and operations.

## PROFESSIONAL EXPERIENCE

### Kalyani Strawboards | Management Analyst

Apr 2020 - Apr 2023

- Automated interactive dashboards using Power BI and Tableau, enabling real-time visibility into operational KPIs.
- Reduced manual reporting time by 60% by building automated data pipelines and reporting systems that were adopted by 15 managers, which accelerated decision-making speed
- Utilized MySQL, Oracle SQL, Excel, and statistical techniques to extract, clean, and validate datasets for performance tracking and forecasting.
- Conducted workflow and business process assessments, identifying gaps and implementing data-driven solutions to enhance operational efficiency.
- Supported strategic planning initiatives with technical documentation, insights, and data-backed recommendations for business improvements.

### SIMS Healthcare Pvt. Ltd. | Data Management Analyst

May 2023 - Aug 2023

- Worked with multiple teams to improve documentation and reporting processes, helping increase communication efficiency and reduce audit exceptions.

### Self-Employed | Operations & Property Management Lead

Jan 2019 - 2022

- Oversaw end-to-end operations for a portfolio of residential rental properties, including tenant onboarding, lease compliance, maintenance scheduling, and financial management.
- Managed rental accounts totaling \$40,000 in annual revenue, maintaining 100% on-time rent collection and accurate monthly reconciliations.
- Implemented standardized rent-tracking and expense-management processes, reducing late payments by 40% and improving financial reporting efficiency for tax filings.
- Negotiated contracts with maintenance vendors and service providers, cutting repair and upkeep costs by 15-25% without compromising property quality.
- Maintained 95%+ occupancy rates through market-based pricing strategies, proactive tenant engagement, and rapid issue resolution.

## EDUCATION

### Northeastern University | Master of Science, Information Systems (GPA: 3.8)

Sep 2023 - May 2025

### SRM Institute of Science & Technology | Bachelor of Technology, Computer Science

Jul 2019 - May 2023

## TECHNICAL SKILLS

- Data & Analytics:** SQL (MySQL, Oracle), Python (NumPy), Power BI, Tableau, Excel (pivot tables, VLOOKUP, dashboards), Statistical Analysis, KPI Measurement, A/B Testing
- Tools & Platforms:** AWS, Git
- Business & Operations:** Data Storytelling, Forecasting, Reporting Automation, Requirements Gathering, Process Optimization, Data-Driven Decision-Making
- Methodologies:** Agile, Workflow Assessment, Continuous Improvement

## PROJECTS

### Leaf Disease Detection

- Developed a convolutional neural network achieving 96% accuracy in detecting plant disease patterns, enabling early intervention and reducing manual inspection dependency.

### Vehicle & Lane Detection

- Engineered a real-time lane and vehicle recognition system using Canny edge detection and polynomial fitting, achieving 70% detection accuracy for highway scenarios.

### Driver Drowsiness Detection System

- Integrated biometric sensors with motion-detection algorithms to identify fatigue indicators, resulting in a 60% reduction in drowsiness-related incidents during prototype testing.
