Objective

Aspiring Software Developer with strong interest in Generative AI and Full Stack Development, aiming to apply skills in Python, React, and Machine Learning to build intelligent and scalable real-world applications while continuously learning new technologies.

Education

- Dr.B.R Ambedkar University Srikakulam** 2025
Bachelor 's Of Technology in Computer Science and Engineering
7.5 CGPA
- Government Polytechnic Srikakulam, Andhra Pradesh** 2022
Diploma in Computer Science and Engineering
80.6%
- ZPHigh School Bontalakoduru, Srikakulam, Andhra Pradesh** 2019
SSC
9.2 GPA

Skills

- Python | JavaScript | React | HTML | CSS | FastAPI | REST APIs | SQL | MySQL | Machine Learning | Generative AI | Git | GitHub | VS Code

Projects

- Face Recognition System**
Developed a Python-based Face Recognition system to identify individuals from images using pre-trained models.
Implemented face detection, encoding, and matching techniques using OpenCV and face recognition libraries.
Achieved accurate identification of known faces from input images.
- Image content description system**
Built an image captioning system to generate human-readable descriptions for input images.
Used pre-trained deep learning models to analyze image content and generate meaningful captions.
Displayed results in real-time for uploaded images.

Certifications

- Kaggle: python, MySQL, Machine learning,Deep learning
- IBM Skills Build : Introduction to HTML5,CSS3 and Java script ,SQL for Data Science

Internships

- Web development intern' in coding samurai
 - Web-based Calculator
Created a simple yet functional calculator web application that users can access through their web browsers.
 - To-Do List Application
Developed a web based to-do list application that allows users to manage their tasks and stay organized

HOBBIES

- Listening Music
Learning new python projects
Coding small practice programs
