

GUNDAPANENI RANI SRI

Phone: +918688440552 | Email: ranisrigundapaneni8@gmail.com

PROFESSIONAL SUMMARY

Motivated and detail-oriented B.Tech graduate with strong analytical and problem-solving skills. Possess a good understanding of data handling, accuracy, and system operations through academic projects. A quick learner with good communication and teamwork abilities, seeking an opportunity in the banking sector to contribute effectively while ensuring reliable and customer-focused service.

TECHNICAL SKILLS

Basic Computer Knowledge: MS Word, MS Excel, PowerPoint

Data Handling & Accuracy: Record maintenance, data entry, validation

Database Basics: Understanding of MySQL, structured data handling

Financial & Analytical Skills: Basic numerical ability, calculations, data analysis

PROJECTS

Project -1: Vegetable Marketing Management System

Domain: Retail & Inventory Management

Technologies: Python

Project Description:

Developed a command-line based inventory and billing management system to streamline vegetable market operations for shopkeepers and customers. The system supports inventory tracking, cart management, automated billing, and profit calculation using structured data handling.

Roles & Responsibilities:

- Designed inventory module managing product records with dynamic stock updates.
- Implemented cart functionality and automated billing system to reduce manual calculation errors
- Applied modular programming concepts to improve code maintainability and scalability
- Performed testing and debugging to ensure accurate profit computation and system reliability
- Improved system efficiency by organizing structured data handling techniques.

Project -2: Improving the Reliability of Online Exam Using Blockchain

Domain: Education Technology

Technologies: Blockchain Concepts, Cryptographic Hashing, Distributed Ledger Model, Web Technologies

Project Description:

Proposed a blockchain-based framework to enhance the security, transparency, and reliability of online examination systems by addressing issues such as data tampering, centralized control, and lack of audit transparency.

Roles & Responsibilities:

- Analyzed security limitations of traditional centralized online examination systems.
- Designed a conceptual decentralized architecture using blockchain principles to ensure tamper-resistant record storage.
- Applied cryptographic hashing concepts to maintain data integrity and immutability of examination records.
- Proposed a distributed ledger model to eliminate single-point failure risks.
- Designed system workflow diagrams to demonstrate secure data flow and verification process.
- Compared traditional database systems with blockchain-based architecture for transparency and security improvements.
- Prepared technical documentation outlining implementation feasibility and challenges.

STRENGTHS

Quick learner,
Hardworking, disciplined,
Strong communication skills,
Target-oriented.

EDUCATION

Bachelor of Technology in Computer Science and Engineering
Rise Krishna Sai Gandhi Group of Institutions 2025 CGPA:7.51

SOFT SKILLS

- Strong analytical and problem-solving skills
- Quick learner and adaptable to new technologies
- Good communication and teamwork abilities

PERSONAL DETAILS

Name:	Gundapaneni Rani Sri
DOB:	21-08-2004
Nationality:	Indian
