Projects

Future Crop-AI Powered Price Prediction For Agri and Vegetable Market

- Built an ML model using Random Forest and Decision Tree to predict crop prices with up to 87% accuracy, analyzing 10,000+ records of historical price and weather data as part of my academic project.

Invoice Management and PDF Generation System

- Developed a React-based invoice system with client auto-suggestions, dynamic item management, real-time totals, and PDF export using html2canvas and jsPDF, featuring professional A4-formatted invoice previews.

Medical Insurance Price Prediction Using Machine Learning

- Developed a machine learning model analyzing 1,300+ insurance records with 5 key features. Trained and compared models including Linear Regression, Random Forest, and Gradient Boosting, achieving an R^2 score of 0.85.

Co-Curricular Activities

- **Secretary, She Inspires Women's Chapter-SPHN** (2023-2024)
- **Participated in 36 Hour Ideathon** (Sphoorthy Engineering College, Z-LABS)
- **Participated in J-HUB 36 Hour Hackathon** (Sphoorthy Engineering College, JNTUH)
