

VARRI JAYANTHI

Visakhapatnam, AP | jayanthivarri@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Aspiring Data Scientist and AI engineer skilled in Python, SQL, and FastAPI. Proficient in building scalable REST APIs, data-driven applications, and machine learning models. Familiar with cloud platforms, concepts of LLMs and GenAI solutions.

EXPERIENCE

Data Science Intern | Unified Mentor

02/2026 – 05/2026

- Build an end-to-end churn prediction model on 10,000 + customers records using XGBoost, achieving ~87% accuracy and ROC-AUC of 0.86.
- Performed EDA to identify key churn drivers (age, balance, activity) using Pandas, Matplotlib, and Seaborn for business insights.
- Developed a Streamlit dashboard to visualize KPIs, customer risk and real-time churn predictions.

EDUCATION

Aditya College of Engineering & Technology, East Godavari

2021-2025

Bachelor of Technology in Electrical and Electronics Engineering | CGPA:8.32

AP, India

TECHNICAL SKILLS

- Programming Languages & Core Concepts:** Python, SQL, C, OOP (Object-Oriented Programming), DSA basics.
- Data Analytics & Visualization:** EDA, Data Cleaning, Visualization, Statistical Analysis, Power BI, Tabulae.
- Machine Learning:** Supervised & Unsupervised Learnings, Algorithms, Feature Engineering, Model Evaluation, Model Deployment
- Deep Learning:** ANN, CNN, Neural Networks, Keras, TensorFlow, Image Augmentation
- Artificial Intelligence:** Generative AI, LLMs, RAG, Prompt Engineering, Transformers, Langchain, FASTAPIs
- Databases & Cloud:** SQL Server, MySQL, AWS (s3, EC2), Cloud Computing (Google), Azure (VMs, Blob Storage), Docker.

PROJECTS

Loan Prediction Web Application

01/2026 - 02/2026

Tech: Python, FastAPI, Scikit-learn, Docker, HTML, CSS, Decision Tree, GridSearchCV

- Built and optimized a Random Forest model using GridSearchCV, achieving F1-score of 0.85 and Recall of 0.86.
- Designed and optimized SQL queries for data retrieval and performance improvement.
- Developed RESTFUL APIs using FastAPI for real-time predictions and model deployment in Docker.

Online Examination System

02/2024– 04/2024

Tech: Reactjs, Nodejs, MongoDB, Redux js, Cloud Computing, GitHub, AWS

- Built a MERN stack web application for online exams with authentication and result processing.
- Deployed on AWS (EC2, S3) ensuring scalability and reliability

CERTIFICATIONS

- IT Specialist Python Programming Certification – Pearson
- Machine Learning with Python - IBM
- AWS Cloud Computing – Internshala

HOBBIES

- Playing games
- Listening to music
- Travelling
