Education

Lakireddy Bali Reddy College of Engineering
Artificial Intelligence & Data Science (B. Tech)
CGPA: 8.54

Mylavaram
2021-2025

Internship

TARAS SYSTEM AND SOLUTIONS | AI-ML Virtual Intern

Online | Jan 2025 – Apr 2025

Completed a virtual internship focusing on real-time AI and ML projects, including word extraction, hostel management system, WhatsApp analysis, spam detection, heart attack prediction, hand gesture recognition, and a virtual calculator. Contributed to model development and implementation workflows throughout the internship.

BHARATH INTERN | Web Development Intern

Online | Feb 2024 – Mar 2024

Developed responsive web applications, including a Netflix clone and personal portfolio, using HTML, CSS, and JavaScript. Focused on UI design, layout structure, and front-end implementation throughout the internship.

Skills

Programming Languages : Python, C
Libraries/Frameworks : HTML, CSS, Flask
Databases : MySQL
Core Areas : Machine Learning, Deep Learning, AI

Projects / Open-Source

Dissecting Facial Features: A Deep Learning Synthesis for Age and Gender Prediction

DL, FLASK, HTML, CSS, JS

Developed a deep learning-based model leveraging the ResNet-50 architecture for real-time age and gender detection. Trained on the UTKFace dataset, utilising advanced feature extraction techniques to ensure robust predictions. Designed and integrated a user-friendly Flask-based web interface for seamless image upload and instant feedback, showcasing the model's scalability and efficiency in applications such as personalized marketing, security systems, and demographic analysis.

Driver Drowsiness Detection System Using Deep Learning

DEEP LEARNING

Developed an advanced Driver Drowsiness Detection System using Convolutional Neural Networks (CNN) to improve road safety. The system analyses live video feeds from in-vehicle cameras to monitor drivers' eye movements and facial expressions, providing real-time alerts for drowsiness.

Deciphering Cardiac Destiny: Unveiling Future Risks Through Cutting-Edge Machine Learning Approaches

MACHINE LEARNING

Built a real-time cardiac arrest prediction system using machine learning techniques to analyze patient health patterns and risk factors. The solution enhances proactive medical response by forecasting cardiac events with improved accuracy.

Aesthetic Decor

HTML, CSS, JavaScript

Designed and implemented a deep learning model with CNNs to predict the most intense color in images, achieving high accuracy through effective data preprocessing and model design.

Certifications / Achievements

- Published a Machine Learning research paper.
- Completed Accenture Nordics Software Engineering Simulation.
- Certified in Python, Machine Learning, Java, and HTML.
- Volunteered and coordinated technical events.

Hobbies: Coding, reading tech blogs, learning new technologies, and listening to music.

Interests: Artificial Intelligence, Machine Learning, Generative AI, and Computer Vision.

State: Andhra Pradesh.
